Certified to work with special needs children

Other programs: Blender, Davinci Resolve, Rhino,
ZBrush, Cura, UE4, Sony Vegas, MS Office, Fishbowl

Experience in product photo/videography, marketing,
3D animation, VFX, & graphic design

WORK EXPERIENCE:

Om Vapors | January 2018 - Current

Working at a small company, I take on many positions and am constantly faced with unique challenges. I typically work in the cleanroom where we (myself with 1-3 other people) mix, bottle, label, and keep an inventory of all the juice being produced by Om. I am also their primary graphic designer web designer, photographer, and 3D artist; I design the labels for the bottles, take the product and promotional photography, designed & update the website, and model/print any 3D component we may need. Working with this fairly small business has taught me how to make the most of my time for the better of the company, in addition to teaching me new skills, such as how to build a clean room, a doorway, how to handle hazardous material, how to use a variety of new computer programs and hardware, and so much more. It has also given me insight as to how a business runs.

Independent Contracting | April 2017 - Current

As an independent contractor, I work directly with clients and negotiate what services I can provide for the client and we work out a contract that binds us to fulfil our end of the deal. I have made several websites for clients (Om Vapors, Everything Rocks Masonry, Complex Machining, & more), done product concepts and animations (Lumia Stream, XEL Labs, Om Vapors), done video work for different YouTube channels (ERMasonry, music videos for SoFar, Binauralive, & Type Blue) for over 113K total views, as well as doing photography, including product photography, portraits, event photography, & wedding photography.

Uber Driver | April 2017 - January 2019

Papa Johns Delivery Driver | February 2016 - June 2018

Amazon | November 2012 - January 2013

Hobbies & Interests

Playing music (guitar, piano, bass, drums)

Exploring nature, abandoned places

Photography (in said abandoned places)

3D printing, laser cutting

Making digital art to learn/create new programs & techniques
